

Extend your summer enjoyment with natural gas

Want to get more out of your summer? You can enjoy the outdoors a bit longer with a variety of outdoor natural gas appliances. They make outdoor living easier, more fun and more comfortable.

Natural Gas Grills

They're convenient, safe and easy to use. Unlike propane tanks that need to be refilled, the natural gas supply is unlimited because it taps directly into your home's natural gas supply. Plus you'll enjoy a cooler kitchen, reducing your home's cooling costs during the summer months. Choose from portable units or grills that can be installed as permanent fixtures on patios or decks.

Natural Gas Lighting

Outdoor gas lighting adds charm, value and security to your home. You can safely and attractively illuminate patios, walkways, driveways, gardens, decks and pool areas. They're reliable and don't depend on electricity so they'll continue to shine brightly during power outages. Plus, natural gas lighting gives off a warm amber glow that doesn't attract insects.

Natural Gas Pool and Spa Heaters

Extend the enjoyment of your pool, hot tub or spa by several weeks in the spring and fall with a natural gas pool heater. High-efficiency natural gas pool and spa heaters transfer more heat to the water while using less gas. Automatic ignition eliminates the need for a constantly burning pilot light, reducing your energy costs.

Natural Gas Patio Heaters

With a natural gas-fired infrared patio heater, the outdoor season around the pool or patio lasts months longer. Patio heaters are umbrella shaped and radiate heat downward to warm a 12 to 20 foot area and are most effective when temperatures are between 50 and 70 degrees.

For more information and to find out where to purchase these outdoor appliances, call us at 1-888-2-YANKEE or visit www.yankeegas.com. Financing programs are available for converting to natural gas and adding new natural gas appliances to your home.
