In accordance with Public Act 93-74, Sect. 65, as amended by Public Act 93-332, Sect. 8(c), manufacturers whose Standard Industrial Classification* (SIC) codes are from 2000 through 3999 shall receive a bill credit equal to five percent (5.0%) times the Base Bill rendered under the applicable general service rate or contract:

The Base Bill consists of those charges and credits set forth in the applicable service rate, exclusive of the Purchased Gas Adjustment and other adjustments as approved by the Department, and prior to the inclusion of the State of Connecticut Sales Tax.

Any customer claiming eligibility for this rider shall certify, in writing, to the Company that the appropriate SIC code for its business falls in the range from 2000 through 3999 or an equivalent classification in accordance with the North American Industrial Classification System (NAICS).

Rate TRS Operators may also be eligible for this GET reduction if it is determined, based upon CGS Sec. 12-265(b)(1)(E), that they are engaged in sales-for-resale transactions. Such Operators are also required to provide the Company with written certification of eligibility.

*The classification shall be in accordance with the Standard Industrial Classification Manual, United States Office of Management and Budget.
